

Lithionics Marine Batteries

Double the run time. Five times less weight!

Perhaps no other element on earth places as many demands on electrical equipment as water. Not only do Marine batteries need to be reliable, but they also must be able to withstand a wide range of temperature swings and frequent downtime. *Lithionics Battery's* new lithium-ion packs are 2 to 3 times more efficient than traditional lead-acid batteries. More Power time, faster re-charge times, eliminating weight from your boat.

Lithionic batteries provide power for propulsion motors, marine accessories and virtually any engine-starting needs. Its corrosion-resistant high quality brass terminals provide reliable starting power in all weather conditions. Its rugged, military-grade construction features robust, yet shockingly light casing offers superior vibration resistance.

Whether you're looking to soar down the shoreline or a sleepy saunter up the coastline trolling for trout on your own time, *Lithionics Battery* has a solution that fits whatever your needs may be...even if we have to custom engineer it!

LITHIUM ION BATTERIES: 48V100AG31EXT

100 Lithium Amp Hours 132 Lbs. Size LxWxH Per case = 13x6.85x10.25 (4 required)

LITHIUM ION BATTERIES: 72V60A G31

60 Lithium Amp Hours, 155Lbs. Size LxWxH Per case = 13x6.85x8.5 (6 required)

LITHIUM ION BATTERIES: 72V100A G31EXT

100 Lithium Amp Hours, 198Lbs. Size LxWxH Per case = 13x6.85x10.25 (6 required)
